Autonomic Nervous System Study Guide The peripheral nervous system consists of the somatic nervous system (SNS) and the autonomic nervous system (ANS). The SNS consists of motor neurons that stimulate skeletal muscles. In contrast, the ANS consists of motor neurons that control smooth muscles, cardiac muscles, and glands. In addition, the ANS monitors visceral organs and blood vessels with sensory neurons, which provide input information for the CNS. The Autonomic Nervous System - CliffsNotes Study Guides autonomic nervous system study guide 1. Describe the sensory arm of the ANS, noting the general types of receptors supplying input.
