drain The second motor (H) is equipped with motor case drain line (G). Pressure oil comes from retract port on SCV and return oil is routed to extend port. When motor return oil is routed to an SCV, a special return hose tip (O) is required to prevent high-pressure oil from moving back toward the motor and possibly damaging the seals. When motor is shut off, SCV lever is moved to float position to allow motor to coast to a stop. Motor Application Using Power Beyond and Motor Case Drain In the photo above, the small line that is T'd in to the main return oil line IS the case drain line. This reaches to the back of the tractor, where it can be conveniently hooked up to an implement needing this 3rd line. The oil flows from the implement, returning up
