industry in its Strategic Plan to reduce injuries and illnesses and prevent fatalities. Shipbuilding and Ship Repair - Overview |

Occupational ... A floating dry dock is a type of pontoon for dry docking ships, possessing floodable buoyancy chambers and a "U"-shaped cross-section. The walls are used to give the dry dock stability when the floor or deck is below the surface of the water.

When valves are opened, the chambers fill with water, causing the dry dock to float lower in the water. The deck becomes submerged and this allows a ship
