Glatt Fluid Bed Technology As a pioneer in fluidized bed technology, we are now the partner to companies in the pharmaceutical, food, animal feed and fine chemicals industries. Glatt offers a unique portfolio of innovative products and extensive services to support your company across the entire process chain, including process development for new products and ... HOME - Glatt Integrated Process Solutions The efficient solution for controlled particle drying. Fluidized bed drying is the optimal method for controlled, gentle and even drying of wet solids. The intensive heat/mass exchange of the fluidized bed product makes this method particularly effective and time-saving. The technology is also suitable for post-drying of spray granulated or extruded products with very low residual moisture. Fluidized bed drying - Glatt Integrated Process Solutions Fluidized bed systems. As a pioneer in fluidized bed systems technology, we offer our customers a wide range of fluidized bed systems for all powder processing industries. From lab and pilot systems to complex systems for production. Whether batch processing or continuous operation, with Glatt fluidized bed systems, everything is possible: Our laboratory systems are capable of processing product volumes of very few grams, while our production systems can handle capacities of several tons. Fluidized beds - Glatt Integrated Process Solutions Glatt Fluid Bed Technology | wikimaniacs.com The fluid bed granulation process (also known as agglomeration) involves suspending particles in an air stream and spraying a

liquid from the top of the system down onto the fluidized bed (top-down spray). Particles in the path of the spray get slightly wet and become sticky. Glatt Fluid Bed Technology - [skycampus.ala.edu](http://skycampus.ala.edu) The core technology of the Glatt group of companies is the fluid bed technology for the drying, granulating, pelletizing (see also spheronization) and the coating of solid compounds. Glatt has shaped and constantly further developed this technology. Glatt Fluid Bed Technology - [sima.notactivelylooking.com](http://sima.notactivelylooking.com) Solutions for coating small particles. Spray coating in a fluidized bed system produces an optimal surface coating for your product through even application of a film material. Depending on requirements, the product properties can be influenced and enhanced. With this method, particles having different shapes and sizes are moved around in the fluidized bed and simultaneously sprayed with a liquid. Fluidized bed coating - Glatt Integrated Process Solutions Fluid bed drying is a particularly effective and gentle way to dry, as the entire surface of each individual particle is available for heat and humidity transfer. With the addition of spray nozzles, fluid bed machines quickly developed into fluid bed granulators, in which sprayed liquids lead to the agglomeration of powder particles. Fluidbed Technology for the coating of powders, pellets ... Glatt engineering project for GMP biorefinery of NSTDA in Thailand Glatt selected for Engineering Project for new GMP Biorefinery by NSTDA in Thailand 25.08.2020 11:17 Products - Glatt Integrated Process Solutions A fluidized bed is a physical phenomenon occurring when a quantity of a solid particulate substance is placed under appropriate conditions to cause a solid/fluid mixture to behave as a fluid.

This is usually achieved by the introduction of pressurized fluid through the particulate medium. This results in the medium then having many properties and characteristics of normal fluids, such as the ability to free-flow under gravity, or to be pumped using fluid type technologies. The resulting phenomenon Fluidized bed - Wikipedia Ever wondered how the Wurster process works? This video gives an in-depth explanation on the Glatt Wurster HS process. Additionally, it shows the key technic... Glatt Wurster HS coating process in a fluidized bed - YouTube Glatt spray granulation with innovative fluidized bed or spouted bed technology is an optimal process for the manufacture of fertilizer granulates. Granulate construction and subsequent drying can be carried out in a single process step.
