This paper introduces a new learning paradigm, called Learning Using Statistical Invariants (LUSI), which is different from the classical one. In a classical paradigm, the learning machine constructs a classification rule that minimizes the probability of expected error; it is data-driven model of learning. In the LUSI paradigm, in order to construct the desired classification function, a ... Rethinking statistical learning theory: learning using ... Statistical Theory - Sher

Muhammad ... In common parlance

the term statistics is used in this

sense synonymously with the term

data e.g. we hear “statistic of

exports & imports” or “Statistics of

prices in Pakistan”. Here the term is

used in the plural number and

refers to data (or figures)

concerning exports & imports and

prices". BA/BSc (Part-II) 4th (Fourth Year) Statistics Notes Punjab

... Computational learning theory, or statistical learning theory, refers to mathematical frameworks for quantifying learning tasks and algorithms. These are sub-fields of machine learning that a machine learning practitioner does not need to know in great depth in order to achieve good results on a wide range of problems. Nevertheless, it is a sub-field where having a high-level understanding of ... A Gentle Introduction to Computational Learning Theory Probability theory is the branch of mathematics concerned with probability. Although there are several different probability interpretations, probability theory treats the concept in a rigorous mathematical

manner by expressing it through a set of axioms. Typically these axioms formalise probability in terms of a probability space, which assigns a measure taking values between 0 and 1, termed ...
