Sterilization Of Medical Devices

Sterilization Most medical and surgical devices used in healthcare facilities are made of materials that are heat stable and therefore undergo heat, primarily steam, sterilization. However, since 1950, there has been an increase in medical devices and instruments made of materials (e.g., plastics) that require low-temperature sterilization. Sterilization | Disinfection & Sterilization Guidelines ... In fact, ethylene oxide sterilization accounts for approximately 50 percent of medical devices that require sterilization before devices get to patients. And a single sterilization facility can be...
