Auto - High Performance Automatic ... The TH400 is the largest of the common GM auto transmissions, but still surprisingly compact in light of the immense power they can handle. There are two significant variations of the TH400. The TH375 was a version of the transmission used from 1972-1976 in smaller displacement cars. The Novak Guide to the GM TH400 Automatic Transmission The Turbo 400 transmission, known officially as the Turbo-Hydramatic and commonly referred to as simply the TH400, was part of a family of automatic transmissions developed and produced by GM. It was designed with a three-element turbine torque converter mated to a epicyclic planetary geartrain, thus delivering three forward speeds
